

AMENDMENTS TO SPECIFICATION

Please amend page 3, line 34 to Page 4, line 5, as follows:

The main characteristics of this invention are the specially designed center hollow joint post 3 which links the LCD display 1 and the CD player 2. The hollow of the joint post 3 allows the passage of cable. The lower end of the joint post 3 will enter into the connecting holes 201 and 211 on the upper casing 20 and the lower casing 21 and lock therein, permitting a rotation of the CD player 2 at a limited angle. The upper end of the ~~join~~^{joint} post 3 links with the LCD display and is locked with a pin 101, permitting a 360° reversal of the LCD display.
